

**Title: Preliminary Experimental Evaluations of
Occupant Behavior during Load Shedding**

Report Date: January 2014

**Report Author(s): S. Malenchak, M Sorensen Allacci,
C. J. Andrews**

CBEI was referred to as the Energy Efficiency Buildings HUB at the time this report was developed.

Report Abstract

There is a growing body of literature on the effects of load shedding in controlling energy demand and supply, but there is virtually no research on the behavioral effects this practice may have on building occupants. This report describes the methods and results of an interrupted time series quasi-experiment used to try to capture these results.
